

Curriculum vitae

Dr. Arno Lukas
emergentec biodevelopment GmbH
www.emergentec.com

Dr. Arno Lukas serves as managing partner at emergentec biodevelopment GmbH. The Vienna/Austria-based tech company develops advanced analysis concepts and software solutions for biomedical R&D applications and data rich industries. He co-founded the company in 2002 and has a track record of 20 years in successfully designing, realizing and exploiting life science IT solutions, with translational research expertise spanning from biomedical research, pharmaceutical discovery to pre-clinical drug and biomarker development. Next to his management responsibilities related to innovative product development, including software license deals with European and US partners, he leads the R&D efforts of his institution in translational R&D projects.

Arno holds a PhD degree in Biochemistry from the University of Vienna, and worked as visiting scientist at the F.R.A.E.-C.N.R. Bologna, Italy, the Humboldt University of Berlin, Germany, and the Los Alamos National Laboratory, New Mexico, USA.
